REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Hirata shows a package having a lead (figure 11), a semiconductor chip with a first and second light detecting section (figure 11), an inherent connection means for electrically connecting the semiconductor chip to the lead, a first lens and a second lens (figure 1 and 7), and a lens holder (figure 1 and 7). Varshneys shows a semiconductor chip and a lens assembly that are made of a material with substantially equal thermal expansion coefficient. It would have been obvious to modify Hirata to include the material selection taught in Varshneys for the lens holder because this would minimize the effects of thermal expansion on the distance determined by the device. However neither Hirata nor Varshneys show the specific geometry of the reference boss and absorbing boss of the first and second lenses and the reference hole and the absorbing hole of the lens holder, where the reference holes and the absorbing holes are in line with the centers of the first and second lens holes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luke D. Ratcliffe whose telephone number is 571-272-3110. The examiner can normally be reached on 8:00-4:30 M-F.
